

Balaji M

Cloud & Web Developer

Motivated Web Developer with hands-on internship experience at ApexPlanet. Strong in front-end development, with a focus on building responsive, clean, and user-friendly interfaces. Have a basic understanding of cloud computing and AWS fundamentals. Eager to learn and Excited to work on real-world projects, collaborate with teams, and deliver high-quality solutions that create real impact.

Work Experience

ApexPlanet, Web Development Intern 08/2025 – 10/2025

- Contributed to the development of an E-Commerce Shopping Website by building and enhancing 6+ responsive web pages and clean UI implementation using front-end best practices.
- Improved mobile responsiveness and cross-browser compatibility, increasing UI consistency across desktop, tablet, and mobile devices.
- Collaborated with a team of 3–5 developers to implement UI components based on design requirements.
- Integrated on reduced page load issues by optimizing HTML/CSS structure, leading to an estimated 15–20% improvement in front-end performance.
- Used version control GitHub to manage code changes and worked with teammates on code reviews, which helped get quicker feedback and reduced the need for rework.

Projects

- Attendance Management System using Face Recognition
- Developed an automated face recognition-based attendance system using Python and OpenCV to replace manual attendance tracking and improve accuracy.
- Built core functionality to capture, train, and recognize facial data for up to ~25 samples per user, enabling reliable recognition and attendance marking.
- Implemented a flow that registers users, trains the face recognition model, and automatically logs attendance with timestamped CSV reports, reducing manual work by ~90%.
- Ensured live webcam integration for real-time face detection and logging, leading to faster attendance marking (<5 sec per user) and improved usability for end users.
- Included features to view and export attendance records, supporting efficient review and record-keeping for multiple sessions.

Technologies

- Programming Language:** Python, Object-oriented Programming, Data Structure and Algorithms, Front-End, HTML, CSS, JavaScript, PHP.
- Database Management:** MySQL, SQL, MongoDB
- Frameworks and Tools:** ReactJS, NodeJS, Flask, Django, GitHub, VS Code, Antigravity
- Cloud Platforms:** AWS (EC2, RDS, VPC, Lambda, S3, IAM, CloudWatch, CloudTrail), GCP (Compute Engine, Cloud Run, Cloud Storage, BigQuery, VPC).
- Containerization & Orchestration:** Docker, Kubernetes (EKS, container deployment, runtime security).
- Monitoring & Logging:** CloudWatch, Prometheus, Grafana, ELK Stack.
- Infrastructure as a Code & Version Control:** Terraform, GitHub, GitLab.

Achievements

- Improved web app performance by 15–20% through optimized front-end design and responsive UI techniques.
- Built a face recognition attendance system, reducing manual effort by ~90% and enabling real-time tracking (<5 sec/user).
- Developed 6+ responsive web pages, ensuring cross-browser compatibility and consistent user experience across devices.
- Enhanced team productivity using GitHub collaboration, reducing rework and improved code efficiency.

Education

Bachelor of Science, Computer Science

PET Arts & Science College

2026

HSC, Information Technology

Mumbai University

2022

Certifications

Oracle Cloud Certified AI Foundational Associate -

Oracle Cloud

Deloitte Australia - Technology Job Simulation - Forge

AWS Cloud Practitioner Essentials - Amazon Web Services (AWS)

Python for non-programmers - LinkedIn Learning
